

Amendments to the Specification:

Please replace the title with the following title:

Image Recording and Selective Reproducing Apparatus

Please replace the last paragraph on page 2 with the following replacement paragraph:

Fig. 7D is the recording state of a recording medium in the triple-speed recording mode. Fig. 7E is an example of a reconstructed image displayed on the monitor. In this case, each frame is recorded every 3/60 minute second so that recording is made on the recording medium in the order of A1, B4, C7, A10, B13, C17 and so on. Images to be reconstructed and displayed are in the order of A1, A10, A19 and so on in the case the frame switcher selects Channel A.
